

Bini Donato

Position: Researcher Istituto per le Applicazioni del Calcolo, CNR

Period covered: 1995 -today.

I Scientific Work

The main topic of my interest is General Relativity with special attention to the analysis and the interpretation of exact solutions of Einstein's field equations.

In particular, I'm interested in spacetime splitting techniques, measurement process and the role of the observer in General Relativity, particle dynamics in certain fixed gravitational backgrounds (either test particles with scalar structure: the mass or particles with internal structure: spinning test particles and particles with quadrupolar structure), gravitational perturbations, gravitational waves.

I'm an expert user of MAPLE™ tensor calculus package.
